DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The functional portion of the means plus function limitation does not seem to describe the disclosed invention accurately. 'As best understood', the disclosed 'means for biasing' biases the handle portion --in the direction towards-- the tongue portion not "away from".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 5, 6, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,848,813 to Fildan.

Art Unit: 3677

Fildan '813 teaches Applicant's claim limitations including : a "handle portion" - as shown in Fig 3, "removably engaged" - via threads 7, "with a tongue portion" - 8, "means for biasing" - 6,6a.

As regards claim 3, Fildan '813 discloses one "ear" for each arm for a different use.

As regards claim 6, the tongue is shown to have a relatively "long slide" or full cylindrical portion adjacent the angled portion in Fig 2.

As regards claim 10, Fildan '813 teaches Applicant's claim limitations including : a "handle portion" - as shown in Fig 6, "removably engaged" - as above, "with a tongue portion" - 8, "compressible arm" - either of 206,206a, a "ring attached to said compressible arm" - 220. Functional recitation of "for ease in grasping,..." does not further define any particular structure of the ring that can be relied upon for patentably defining from the prior art. See MPEP 2114. Part 220 is inherently capable of being more easily (compared to 206a for example) and twisted/pulled to open the tongue. It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987). The law of anticipation requires that a distinction be made between the invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claims under consideration "read on" something disclosed in the reference, i.e., all limitations of the claim are found in the

reference, or "fully met" by it. *Kalman v. Kimberly-Clark Corp.*, 218 USPQ 789. Claims in a pending application should be given their broadest reasonable interpretation. In re Pearson, 181 USPQ 641 (CCPA 1974).

Allowable Subject Matter

5. Claims 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 3, 4, and 7-9 are would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
